EDUCATION

Northwestern University

Evanston, IL

Bachelor of Science in **Applied Mathematics** and **Economics**

September 2025–Expected June 2028

- GPA: **3.67/4.0** | ACT: **35/36**
- Relevant Coursework: Probability, Statistics and Data Science, Economics, Calculus, Linear Algebra

SKILLS

Programming: Python, JavaScript, HTML, CSS, Java, Swift, MATLAB, SQL, LaTeX, R, Lua

Languages: English, Mandarin Chinese

EXPERIENCE

Rippleshot

Chicago, IL

Artificial Intelligence Intern

June 2024–August 2024

- Researched AI applications in credit card fraud detection by assessing machine learning models and risk management frameworks, contributing insights to strategic discussions with the Chief Technology Officer
- Created a detailed presentation on AI-driven fraud prevention trends and risks, integrating data science and finance coursework to highlight innovation opportunities and ethical safeguards

Norris University Center

Evanston, IL

Game Room Attendant

September 2025–Present

- Create an inclusive, community-oriented environment by welcoming guests, providing responsive support, enforcing policies, and troubleshooting gaming equipment to ensure a smooth, enjoyable experience

Northwestern College Prep Program

Evanston, IL

Residential Advisor

June 2026–August 2026

- Mentored and supported a cohort of students, serving as the primary point of contact for student concerns, resolving conflicts, and providing guidance on academic, social, and personal matters

PROJECTS

Gastrostomy (G-) Tube Button Cover

Evanston, IL

Client: Lurie Children's Hospital, Chicago, IL

September 2025–December 2025

- Developed within Northwestern's Design Thinking & Communication course, working with a four-person team to ideate, prototype, and iteratively refine the design while providing regular progress updates to the project partner
- Presented the final prototype to 20+ attendees at a project expo, highlighting the product's design process, functionality, and practical applications

Modelling and Categorizing Snow Crystal Growth with Cellular Automata

Chicago, IL

Illinois Institute of Technology

May 2023–July 2023

- Collaborated with a team of undergraduate researchers to design and implement mathematical models exploring pattern formation in natural systems
- Modeled and simulated snowflake crystal growth dynamics to identify key variables influencing structure and improve the accuracy and visualization of computational results

EXTRACURRICULAR & VOLUNTEER

Northwestern University Solar Car Team

Evanston, IL

Software Team Member

September 2025–Present

- Coordinate with software and electrical teammates to develop embedded software enabling Bluetooth communication between a microcontroller and the solar car's lightboard system

National Honor Society

Libertyville, IL

Community Service Volunteer/Peer Mentor

April 2024–April 2025

Cook Memorial Public Library

Libertyville, IL

Teen Tech Tutor

August 2022–January 2025
